PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building, deploying, and refining production websites using Astro, HTML, CSS, and JavaScript. Delivers responsive information architecture, conversion paths, accessible form behavior, on-page SEO, purpose-limited analytics, Git workflows, and Netlify/Cloudflare releases. Business-operations experience adds client context, documentation discipline, and independent QA to end-to-end frontend delivery.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, Astro, responsive/mobile-first design, Flexbox, CSS Grid, reusable components
Conversion & Forms: hero/CTA hierarchy, audience pathways, Netlify Forms, email capture, validation, accessible errors, thank-you states
Quality: semantic HTML, WCAG basics, keyboard/focus behavior, reduced motion, Core Web Vitals, responsive and cross-browser QA
SEO & Measurement: titles and metadata, canonical URLs, Open Graph, structured data, sitemap, robots, GA4 events, consent-aware measurement
Delivery: Git, GitHub pull requests and Actions, Netlify, Cloudflare, deployment validation, release documentation

SELECTED FRONTEND PROJECTS

- Avodah Wealth Advisory** HTML · CSS · JavaScript · Netlify Forms · GA4
 - Delivered a 29-page public advisory website with five audience pathways and two lead-capture journeys: needs check and consultation request.
 - Implemented honeypot-protected forms, client-side validation, accessible inline errors, first-invalid-field focus, and confirmed thank-you handling.
 - Added GA4 page views and successful generate_lead tracking, sitemap, robots, custom 404, security headers, and GitHub-to-Netlify releases.
- Project Handoff — Fictional B2B SaaS Concept** Astro · Custom CSS · JavaScript · Netlify Forms · GA4
 - Designed and built a conversion-focused private-beta landing page with a hero, problem framing, workflow, benefits, use cases, waitlist, FAQ, privacy, and thank-you routes.
 - Built a three-field form with labels, accessible validation, loading/error/success states, honeypot protection, consent text, and no form values sent to analytics.
 - Documented the brief, content map, visual tokens, component states, responsive behavior, decisions, and QA; verified no overflow across five target widths.
- JC Professional Portfolio** Astro · HTML · CSS · JavaScript · GitHub Actions · Cloudflare
 - Built and maintain a production Astro portfolio with reusable project data, responsive case studies, specialist routing, keyboard-accessible navigation, lightbox behavior, and reduced-motion support.
 - Automated build, internal-link, image-dimension, external-link, and structured-data checks before Cloudflare delivery.

PROFESSIONAL EXPERIENCE
